

Jonas Hemmett

Burlington VT | (802) 363-2073 | jonasgordonhemmett@gmail.com | JHemmett.com

Education

University of Vermont - B.S. Computer Science, Minor in Pure Mathematics *Expected 2027*

Relevant Courses: Machine Learning; Intro Artificial Intelligence; Evolutionary Robotics; Computer Programming I, II, III; Algorithm Design & Analysis; Calculus I, II, III; Statistics for Engineering

Relevant Projects

2026 Hackathon *Spring 2026*

- Worked in a small group to develop an employee timeclock system with facial recognition
- Focused on teamwork, rapid prototyping, concept development, and time management

Personal Website (JHemmett.com) *Winter 2025 - Present*

- Built a personal website from the ground up using HTML, CSS, and basic JavaScript

Blackjack Bot (github.com/Jonas-Hemmett/Blackjack_Bot) *Winter 2025*

- Developed a Raspberry Pi based blackjack bot that won 2nd place at the 2025 UVM CS Fair
- Used the OpenAI API to extract card information from an image of the table
- Integrated micro-electronics (Screen, camera, buttons) allowing for user interaction
- Used Pillow to build a UI allowing for a smooth user experience
- CAD Designed and laser cut a custom acrylic housing
- Built a game engine allowing for games to be simulated on the device
- Created a website (jhemmett.w3.uvm.edu/Blackjack_Bot) to document and showcase it

Point of Sale System (github.com/jonasgordonhemmett-tech/Point_of_Sale_System) *Fall 2025*

- Created a point of sale system to test memory storage methods
- Dynamically reads/writes from memory to JSON files, limiting memory usage and providing persistent storage

Designs and Crafts Handmade Leather Goods *2024 - Present*

- Uses CAD for pattern drafting allowing for high precision and rapid prototyping
 - Sells products locally at Champlain Leathers and online on through Etsy and my website
-

Technical Skills

Programming Languages: C++, Java, Python (Pandas, NumPy, Matplotlib), HTML, CSS, SQL

Software: Onshape, SketchUp, VS Code, CorelDRAW, Git, Windows, Linux, Google Suite

Hardware: Laser cutting, Raspberry Pi microelectronics, PC building

Work Experience

ReSource, Williston VT *2023 - Present*

- Diagnoses, troubleshoots, and repairs donated consumer electronics, including desktop PCs, laptops, and peripheral hardware
- Assists customers with computer and electronics sales and repairs
- Sanitizes storage drives in accordance with data privacy practices before disposal

Hannaford, Williston VT *2021 - 2023*

- Worked both front end (register) and produce positions
